ABSTRACT

PURPOSE: To enable execution of **moxa** cautery even by an applier itself at a low temperature of approximately 40-50 deg.C by a method wherein a specified component is mixed in '**moxa**' used for a **moxa** cautery treatment method to bring the mixture into a pastelike state.

CONSTITUTION: A crushed safflower and water are added to **moxa** to apply steam distillation thereon to sample a distillate. After refined Borneo is added to the obtained distillate (refined oil), a proper amount of glyceline is added to form a pastelike substance. In the use of the so obtained **moxa** refined oil paste, the paste is applied on the skin of an applier, the paste is **sealed** with a **wrap**, and a heat generating body is placed thereon to apply heat at a temperature of approximate 40-50 deg.C.

Abstract:

The invention claims an acupuncture instrument specifically

relates to a smokeless **medicine** bean bean and **moxibustion** instrument and **medicine** prescription. The invention mainly aims to the **moxibustion** smoke after curing environment pollution problem that the design of this utility model claims a smokeless **medicine** bean and **moxibustion** instrument and aiming to different diseases this utility model claims a traditional chinese **medicine** formulation bean. Bean blown smokeless **medicine** **moxibustion** instrument orderly comprises the fan telescopic bracket the heating electric coil **medicine** storage tube treating tube and so on structural. Wherein: Of said base seat is set with fan and fan switch button switch button ring the telescopic bracket; Of said telescopic bracket is set in the hollow structure the inner ring of the electric wire 4 goes through; Of said air inlet hole and the heating electric coil and the baffle plate is connected with hole; Said treatment head is set with the **medicine** storage tube and the **medicine** storage tube support frame; Treatment under pipe or side of treating tube is set at the end for curing mouth seal cover two for curing mouth alternately using. The advantage of this invention is to electric heating five different prescription of chinese traditional **medicine** for treating bean different types of disorders in the process for treating smokeless environment-friendly.

Abstract:

The utility model provides a massage **moxibustion therapy** device, which comprises a main body (1), wherein the main body (1) is a cylindrical body with an empty cavity (2), one end of the main body (1) is a spherical cap shell type pestle head (3) which is matched and connected with the cylindrical body with an empty cavity (2), and the spherical cap shell type pestle head (3) is equipped with a plurality of small holes (4) which are run through the empty cavity (2). The other end of the main body (1) is an opening end, the opening ends of a cover (5) and the main body (1) are matched to seal the opening ends, the inner side of the cover (5) is fixed with a fastening part (6), which is used to fixed a **moxa** (7), the opening end of the main body (1) is **sealed** by the **cover** (5), simultaneously, the fastening part (6) and the fixed **moxa** (7) are arranged in the empty cavity (2) of the main body (1) by the cover (5). The massage acupuncture curer which is provided by the utility model is capable of simultaneously playing the double **therapeutic** action of massage and **moxibustion therapy**, the structure is simple and practical, and the popularization use is convenient. Clinical treatment practices show that the treatment effects are excellent.

Abstract:

The invention cool and hot sanner health care and safety the invention claims a washable cold and hot sanner bath health care function but also has function of sand wind rain and snow fire and toxin resisting ultraviolet radiation and so on the function of new type the tool it is composed of cap sanner sanner clothes and trousers sang nanometer magnetic therapy shoe material and so on main components sanner cap and sanner shoes can be used independently the server is equipped with adjustable clothes body temperature and solar energy photoelectric plate and so on which can adjust the temperature of the raincoat body raincoat body is set on preventing mosquito prevent sand storm veil glove and the **cover** and the safety of side window and it uses the fire-proof and static power supply can be made by this invention claims a collecting device of leisure sanner bath health of the fire to prevent virus and so on the security safeguard of clothes as a whole the function of the invention has wide application foreground.

Abstract:

The utility model relates to a steam-bath box. The back lower side in a steam box main body is provided with a supporting angle plate. A hollow containing chamber is formed under the supporting angle plate and a steam generator is contained in the containing chamber. The steam generator is connected with a connecting pipe to outside. A flexible steam pipe is connected with a steam pipe in the steam box main body. The flexible steam pipe is all round arranged on the surrounding bottom of the steam box main body. The upper side of the back of the steam box main body is provided with a supporting frame for placing a water barrel. A connecting pipe under the water barrel can be connected with the steam generator. The utility model has the advantages of high safety, and the capillary bores of users can be expanded, and the effects of **perspiration**, blood circulation **promotion**, tendon relaxation and activation of blood circulation and tiredness removal can be achieved.
